LED Kit Parts List

- Light Strip
- Mounting Brackets (with mouting screws)
- LED Signal Reciver
- Power Adapter
- RF Remote Controller
- Pack of Zip Ties
- Landscape Staples

Intsallation Instructions

If your Akrobat trampoline has already been installed, remove a few springs to slide under the jump mat and install the Kit under the trampoline. Then follow the instructions below! If you are currently installing your trampoline install the Light Kit during the installation process.

What you will need

If you are installing your kit via mounting brackets, then you will need a power drill. Although We recommend using the included landscape staples! Be sure to have a power outlet near the trampoline or an extension cord to plug the power adapter into!

How to install

For Installation using Staples:

Remove a few springs to access the space under the Jump Mat using the spring tool as shown below.

When unraveling your LED strip, place landscape staples through the weed protection sheet and into the dirt!

Evenly space the staples to secure them. Your LED Strip should look similar to the image below!

Be sure to keep the adapter end of the LED strip on the corner where you have an outlet or extension cord.

For installation using mounting brackets:

Use a power drill to install mounting brackets to the PVC retaining wall.

Attach mounting brackets 3-4 inches below the top of the frame pad on the PVC retaining wall.

Place each bracket 16-18 inches apart from another

we recommend installing the brackets inside the in-ground trampoline hole, once Light kit is installed you may install the springs and mats!

Once all brackets are installed, clip the light strip in place with the LED's facing outwards.

Place the LED strip into each mounting bracket.

When installing the Strip Light into the brackets, be mindful of where you want your power adapter to be located to connect to your power source.

Color Control

Use the included remote to control and choose color settings!

For bluetooth control, download the "LotusLanternX" app!

- The app allows for:
  - music controlled LED lighting
  - Setting the lights to a timer
  - Color Control
  - Mic Controled LED Lighting
  - Also, custom styling

LED Light Strip provided by YardIllumination.com for all your outdoor living and landscape lighting needs!!
